Design - faucets emotion-5mm

Emotion-5mm stainless steel

With straight lines, almost architectural direction, the emotion-5mm collection complements the design program for the upscale commercial sector. It was designed by OCO studio & ing. Castagnoli. A rectangle stands for the central design element throughout the collection. The fine plates of only five millimeters thick brushed stainless steel serve both as a visual highlight as well as to trigger the water flow and temperature regulation.

Emotion-5mm shower series

Showers with wellness factor. The emotion-5mm Shower set, the rain and the showerhead ensure a luxury in the bathroom to luxury feeling for all senses.

Emotion-5mm wall-fitting

Single-lever mixer with perfect design available as flush-mounted wall outlet in two spout lengths. 5 mm brushed stainless steel with square actuator plate. The perfect complement to our concrete wash-basins.

Emotion-5mm washing table faucet

The emotion-5mm one hole basin mixer tap in brushed stainless steel offers a great elegance. Graceful, slim and sturdy. A delight to the eye, fascinating in the art.

Emotion-5mm bathtub faucets

A special kind of bath tub mixer - Emotion 5mm shines with sleek lines and only five millimeters thickness in brushed stainless steel. Shower head and hose fit all of a piece in the appearance of the valve and leave nothing to be desired. The bathtub faucet completes a stylistically sophisticated bathroom equipment.

PUR - series

PUR wall-mounted mixer

Single-lever mixer for concealed installation with chrome finish. Slim design distinguishes this series. The compatible shower head is optional obtainable.

PUR wall-mounted mixer with alteration switch

Single-lever mixer for concealed installation with chrome finish and alteration switch. The compatible shower head is optional obtainable.

PUR shower Faucet

Surface-mounted shower mixer with single lever handle and chrome finish. Supplemented with matching hand shower set.

PUR bath filling taps

The surface-mounted mixer tap in a slim design for the bath with chrome finish. The 120 mm long spout can be supplemented with the in color and shape compatible hand shower set.

PUR concealed wall faucet

A single lever mixer for concealed installation, poured in a noble and decent slim design. Walls-sided two single rosettes, each 70mm diameter.

PUR wall fitting with cover plate

Round and square combined in a chrome finish. The flush-valve tap with a slim design and large cover plate 190x100mm is a head turner on the washbasin.

PUR valve tap

The PUR single lever mixers are available in three heights. The „Little“ one with 135mm Overall height is the perfect fitting for the guest bathroom or toilet.

PUR mixer with high spout

Where much space is required under the spout, 170mm spout height is the right choice. The PUR series perfectly combines form and function.

SteelTec - washrooms in style

SteelTec basin

The wash basin with style - stainless steel basin in combination with a vanity top StoneTec-PRO. Whether matt-brushed or polished stainless steel, this basin is eye-catching.

SteelTec sink

Stainless steel for high demands. The washbasin with industrial design - robust and easy to clean. Perfect hygiene by matt brushed stainless steel in combination with touchless lavatory faucet.

SteelTec urinal

A vandal resistant cover for concealed fixing and the material thickness of 1.6mm make the SteelTec urinal a first choice product. It is the standard of design and robustness which definitely meet all requirements.

SteelTec urinal divider

SteelTec brings style into men's toilet. From the washbasin to Urinal partition wall which enables discretion with a height of 109cm. The matt brushed surface of the urinal divider is a perfect complement to the SteelTec urinals.

CONTI shower room solutions

CONTI flush-mounted shower

A design-oriented high-gloss chrome version extends the proven, still available covers made from vandal proof stainless steel. The well-established, easy to service accessible, robust technique has been retained. Massive, designed for maximum loads thermostatic mixer with scald protection and safety stop are still outstanding features of the CONTI-series valves. The default manually operated bypass valve for thermal disinfection ensures hygiene at a high level.

CONSTOP 2

The new water-hydraulically controlled self-closing valve with adjustable water flow time and scald protection is designed for highly frequented shower rooms. Optionally equipped with bypass solenoid valve, it enables the implementation of a thermal disinfection.

COMPACT

The well-established classic in a new dress with oil-hydraulically controlled self-closing valve. With features like CONSTOP2 Compact is suitable for high performance in harsh environments such as industrial applications.

CONBUS-CNX / CONTEC 3 / CONCASH 2

Hygiene, comfort and safety are characteristics of the electronic shower systems and leave nothing to be desired. Whether as a single-grid solution for paid water delivery or as a water management system with up to 150 taps.

Shell set

The specifically adapted installation kit with flushing pipe, sealing sleeve and stop valve guarantees a professional and service-friendly installation.

Fittings for public sanitary rooms

umaxx

The small umaxx presents itself on the washbasin in a small casing with proven technology washstand. The solenoid valve is seated comfortably accessible under the sink in the corner valve. With the specially designed locking system the cold or mixed water faucet without tools to mount on the washstand.

tipolino SL26 / SL16

A special novelty in the CONTI+ washroom solutions is the mechanical self-closing faucet tipolino SL with temperature adjustment in the operating handle. The water-carrying parts are lead-free and therefore meet the drinking water regulations. With the tool-free assembly, the valve is mounted in „no time“. The water flow time can be set between 5-15 seconds.

tipolino L25P / L15P

Save water by simply pushing a button with tipolino. The electronic self-closing valve with adjustable, user-independent hygiene flush against water stagnation is designed primarily for public and commercial washing rooms. The solid manufactured faucet is available with mixing or without mixing.

Guest bathroom / Hygiene

lino W45

Wall fittings ensure maximum hygiene, the lino W45 can do even more. An infrared close-detection sensor activates the water flow touchless. The valve shuts off automatically after a pre-set water flow time. A 12-, 24- or 48-hour hygienic rinse prevents the build-up of bacteria.

ClaroSwiss

Water filters

The ClaroSwiss water filter has been developed specifically for the requirements in kitchens and bathrooms. It combines the latest filtration technology with intelligent engineering and sets a new standard in the kitchen industry.

The filter cartridge system is modular and consists of a user-friendly multi-function filter head with a compatible family of filter cartridges with different output stages. Thanks to the compact design it can be installed and used almost anywhere.

ClaroSwiss provides perfect water for tasty hot and cold drinks and effectively protects Instant Boiling systems.

- Cartridge exchange in seconds: „screw out – screw in“
- Automatic shut-off valves for a safe exchange
- Automatic pressure relief of the filter head when exchanging the cartridge
- Horizontal or vertical installation for optimal space utilization

One fits all - multi-valve connection head

All in One - multi-stage filter cartridge

Partner with profile

Innovative drive and high standard material form the basis for a high degree of quality. Due to a broad Product portfolio of shower solutions and long-year experience in customization, CONTI is very well-known as a professional partner among specifiers and architects.

Individual solutions are adjusted down to the smallest detail for various facilities and utilizations. Shower places can be designed as exposed or concealed solutions in different colors, forms and materials. The range includes shower facilities, wellness solutions and thermostat batteries.

HighTech offers innovative solutions for public sanitary facilities or private washing facilities. The product range includes a wide range of design washbasins for high-quality washrooms and optically accurate sanitary fittings, design siphons and accessories.

The characteristic of all products is a timeless and clear design and long life.
